

Since 1990, HealthNET has been providing industry leadership and partnering with our clients to achieve success. We have the expertise to bring you best practice knowledge in all MEDITECH platforms. With some of the most experienced MEDITECH consultants in the industry, HealthNET provides a comprehensive level of MEDITECH proficiency.

MEDITECH

Our MEDITECH consulting resources offer a comprehensive suite of MEDITECH strategy, implementation, optimization and staffing services. HealthNET project managers and application specialists are skilled in MEDITECH methodology and bring to the table sophisticated tools that go beyond the “norm” to offer multiple levels of checks and balances which ensure continuity and detailed oversight. Our dedication to adhering to the MEDITECH READY methodology attests to our comprehensive knowledge and ability to manage projects of differing levels of complexity. HealthNET has the skilled resources to ensure that your organization is equipped to optimize your use of the MEDITECH platform.

QUALIFICATIONS

HealthNET’s MEDITECH consultants average more than 20 years of healthcare experience with an expert understanding of MAGIC, Client/Server and 6.x. We maximize the value of your MEDITECH investment by leveraging our collective healthcare expertise and bringing in-depth, hands-on knowledge of the MEDITECH platform. Our team is skilled in recognizing operational improvement opportunities and has the leadership talent to work with your team to determine the best fit for your organization.

IMPLEMENTATION AND OPTIMIZATION

HealthNET’s MEDITECH implementation and optimization services provide for a comprehensive view of the implementation life cycle which captures the process from initial analysis and strategy phases, to the adoption of the system by the physician and clinician community, and on to the enhanced and streamlined use of the system across the enterprise.

Being “READY”

READY is MEDITECH’s sophisticated implementation methodology that takes a comprehensive view of the implementation process, weaving in pre-implementation planning, best practices and dedicated support teams to provide for faster and better system usage outcomes. HealthNET is experienced in READY implementations and has a team of experts with direct hands-on expertise.

Role-Based Access

HealthNET has established a process to more closely create role-defined security within the MEDITECH platform. After the implementation of a minimum use policy, access is determined based upon functionality requirements and menus / access levels are organized and defined.

IMPLEMENTATION AND OPTIMIZATION (continued)

Clinical Systems Advancement

Our advanced consultants are experienced in the planning and implementation of building block models that assist an organization with planning for and implementing clinical information systems. We educate and work with your clinical management team to understand and prioritize the CIS functional areas—CPOE, rules-based ordering, MAR, care planning and documentation.

Our focus on one-on-one education for physicians and clinicians ensures a level of knowledge and familiarity with application usage and assists with overall system adoption. HealthNET tailors these clinical support services to meet client needs whether implementing a single application or a full EHR.

Patient safety and quality initiatives have positioned organizations to seek advanced clinical system support. HealthNET is skilled in assisting with the analysis of current state and providing recommendations for optimizing applications and care standards, often leading to the implementation of enhanced integrated MEDITECH clinical applications.

Revenue Cycle Enhancement

HealthNET's complete approach to the revenue cycle has proven to be successful in increasing cash flow and lowering client days in AR. Our thorough methodology incorporates a strong knowledge of MEDITECH's capabilities with business operations expertise to maximize workflows for the scheduling, registration, charging / coding and business office areas.

MEDITECH Service Release Management

HealthNET has developed a standardized approach that provides for a manageable, streamlined process that supports service releases. Our testing methodology and proven effective toolkit delivers an efficient, comprehensive, repeatable process to support software testing and upgrade implementation.

Reporting and Analytics

HealthNET provides an approach to accessing, organizing and re-engineering your Data Repository (DR), NPR, and Report Designer (RD) reports. Our expertise allows you to extract data to feed Business Intelligence applications or populate performance dashboards. There is much that you can do through the use of your existing DR, RD, and NPR Reports and HealthNET project consultants are skilled at identifying reporting needs and assisting with capturing and managing this data to provide for increased efficiencies and information capabilities.

Web Ambulatory and Patient Portal

MEDITECH provides a solid foundation that enables your organization to gather patient provided data and include it within one patient, one record, one place for the entire story. HealthNET is skilled at the successful implementation and use of these patient driven data capture facilities.
